

*This is the Life!™*

 **SOL**™  
Home Improvements

**Verandahs • Patios • Awnings • Pergolas • Carports**

Get outdoors, sit back and enjoy the great Australian lifestyle with your family and friends.

By adding a SOL™ Home Improvements structure such as a patio, carport, awning or verandah you will create a more enjoyable and practical outdoor space whilst improving the aesthetic appeal of your home.

# The SOL™ Difference

- ✓ Obligation free design and quote.
- ✓ Structures are engineered to comply with the Building Code of Australia.
- ✓ Colour choice from the full range of COLORBOND® colours.
- ✓ Use of Australian BlueScope Steel proven under harsh Australian conditions.
- ✓ Materials are supplied cut-to-length, minimising wastage - so you only pay for the materials required.
- ✓ Option of a 'Structural Gutter' installation method to minimise the use of unnecessary posts.
- ✓ Customise the size, materials and design to suit your budget.
- ✓ Our design consultants can provide colour and style recommendations to suit your home.
- ✓ We can add or remove intermediate posts and beams to suit the layout of your home, as well as your needs and budget.

Our designer options allow you to relax in the knowledge that your home addition will look great whilst adding to the value and enjoyment of your home.

After

Before

## Flat Roof

A flat roof home addition is a versatile and economical solution designed to suit most homes. Flat roof structures are perfectly suited for use as a patio, carport or verandah and can be freestanding or attached to the home.

## Gable Roof

Add character to your home - a gable roof addition can be customised to suit the appearance of your home. From the pitch of the roof to the extensive colour selection, SOL™ shade structures are designed to be appreciated, and are a practical solution that will transform the way you enjoy your outdoor space.

### Combination Roof

For the ultimate in designer style, combine flat and gable structures to provide real visual appeal whilst optimising your ability to enjoy the outdoor space. The sophisticated lines and style of a combined flat and gable roof structure will provide you with satisfaction for many years to come.

### Freestanding or Attached

Add a freestanding undercover square gazebo near your pool, or a long carport over your driveway to provide practical shade where you need it most. Or attach any SOL™ structure to your home or garage to create functional and enjoyable outdoor space that you can enjoy with family or friends.

 **SOL**  
Home Improvements

Sunset –The Sunset® Patio Panel is a purpose-designed roofing material for home improvement projects such as patios, verandahs and carports. Wide pans and attractive ribs enhance the appearance of the roof. Its smoother underside provides a stylish, minimalist appearance that more closely resembles a plain ceiling than the underside of a traditional corrugated steel roof. Sunset® Patio Panels are available in a limited selection of two-toned finishes and are manufactured from Australian BlueScope Steel that is tested and proven to perform under harsh Australian conditions

#### Underside Hi Gloss

#### Insulated Roofing

If you want the most stylish and visually appealing finish, consider our insulated composite roof panel that is a long spanning, insulated, all-in-one roof and ceiling product. An insulated roof offers a more seamless transition between internal and external spaces, with its flat underside matching that of internal ceilings. Being insulated, it also provides greater thermal benefits, whilst also assisting to deaden noise.

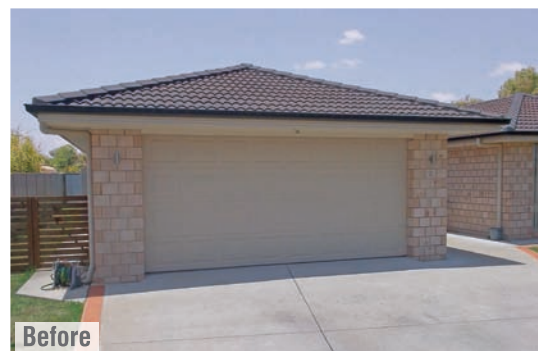

Our Insulated panel is a high performance insulating polystyrene core available for patios in various thickness 50, 75 and 100mm for longer spans and varying thermal performance.

Our sophisticated design software provides you with designer style and colour options so you can customise your home addition to suit your taste and the aesthetics of your home. All SOL™ verandahs, patios, awnings and carports can be designed to cover wide spans for a more streamlined appearance.

Avoid the stress and complication of designing a shade structure to suit your home – our sophisticated ImproveIT™ software will quickly quote, design and customise the verandah, patio, awning or carport to suit your needs and budget.

Our fully engineered structures feature quality components and fittings to ensure structural stability and premium appearance. You can choose your preferred roof profile, colours, post thicknesses, span lengths, roof pitch and much more.

It's often possible to remove intermediate posts and rafters for a cleaner, minimalist look. All screws and bolts are colour coated to match your choice of colours. So you can enjoy the appearance of your verandah, patio or carport for years to come.

Structures can be attached to your home in a number of configurations. Our premium Structural Gutter system provides the most streamlined and sophisticated look, as unlike the budget option, there are minimal support beams and intermediate posts to interrupt your view. We can design attachment methods to suit most home requirements – whether they be a simple straight structure or one that wraps around a building or fits into a 'U shaped' courtyard.

Our goal is to enhance your outdoor living and functional space with a stylish shade structure that you will enjoy for years to come.
